

# AIMB-280

Intel® i7/i5/Core i5/Core i3 Mini-ITX with  
VGA/DVI, 2 COM, Dual LAN, PCIe x16

Preliminary

CE FCC

## Features

- Supports Intel i7/ i5/ Core i5/ Core i3 processor with Q57 chipset
- One Long DIMM socket support up to 4 GB DDR3 800/1066/1333
- Supports dual display of VGA and DVI and dual GbE LAN
- Supports 2COM, 8USB and 4SATA
- Supports embedded software APIs and Utilities

Software APIs:

SMBus

H/W Monitor

Watchdog

Utility:

BIOS flash

eSOS

Monitoring

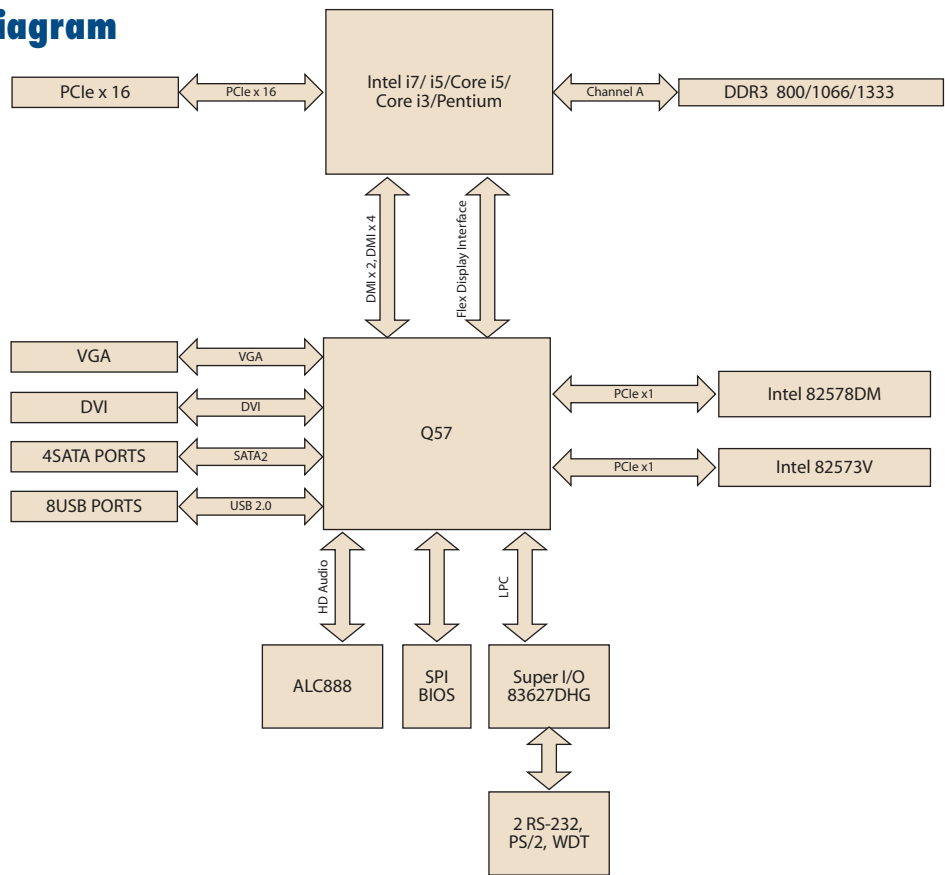

Embedded Security ID

## Specifications

| Processor System         | CPU                    | Intel i7  | i5       | Core i5  | Core i3  | Pentium                   |
|--------------------------|------------------------|---|----------|----------|----------|---------------------------|
|                          | Max. Speed             | 2.8 GHz   | 2.66 GHz | 3.33 GHz | 3.06 GHz | 2.8 GHz                   |
|                          | Integrated Graphic     | Only Intel Core i5/i3/Pentium are embedded with integrated graphics |          |          |          |                           |
|                          | L2 Cache               | 8 MB  | 8 MB     | 4 MB     | 4 MB     | 3 MB                      |
|                          | Chipset                | Q57   |          |          |          |                           |
| Expansion Slot           | BIOS                   | AMI 64 Mbit SPI   |          |          |          |                           |
|                          | PCI                    | -   |          |          |          |                           |
|                          | Mini-PCI               | -   |          |          |          |                           |
| Memory                   | PCIe x16 (Gen2)        | 8 GB/s per direction, 1 slot  |          |          |          |                           |
|                          | Technology             | DDR3 800/1066/1333  |          |          |          |                           |
|                          | Max. Capacity          | 4 GB  |          |          |          |                           |
| Graphics                 | Socket                 | 1 x 240-pin DIMM  |          |          |          |                           |
|                          | Controller             | Intel GFX (only Clarkdale)  |          |          |          |                           |
| Ethernet                 | VRAM                   | TBD   |          |          |          |                           |
|                          | Interface              | 10/100/1000 Mbps  |          |          |          |                           |
|                          | Controller             | GbE LAN1: Intel 82578DM, LAN2: Intel 82583V                         |          |          |          |                           |
| SATA                     | Connector              | RJ-45 x 2   |          |          |          |                           |
|                          | Max Data Transfer Rate | 300 MB/s  |          |          |          |                           |
| Rear I/O                 | Channel                | 4   |          |          |          |                           |
|                          | VGA                    | 1   |          |          |          |                           |
|                          | DVI                    | 1   |          |          |          |                           |
|                          | Ethernet               | 2   |          |          |          |                           |
|                          | USB                    | 4 (USB 2.0 compliant)   |          |          |          |                           |
|                          | Audio                  | 3 (Mic-in, Line-out, Line-in)                                       |          |          |          |                           |
|                          | Serial                 | 2 (1 of RS-232, 1 of RS-232/422/485)                                |          |          |          |                           |
| Internal Connector       | PS/2                   | 2 (1 x keyboard and 1 x mouse)                                      |          |          |          |                           |
|                          | USB                    | 4 (USB 2.0 compliant)   |          |          |          |                           |
|                          | Serial                 |   |          |          |          |                           |
|                          | IDE                    | -   |          |          |          |                           |
|                          | SATA                   | 4   |          |          |          |                           |
|                          | CompactFlash           | -   |          |          |          |                           |
|                          | Parallel               | -   |          |          |          |                           |
| Watchdog Timer           | IrDA                   | -   |          |          |          |                           |
|                          | DIO                    | -   |          |          |          |                           |
| Power Requirement        | Output                 | System reset  |          |          |          |                           |
|                          | Interval               | Programmable 1 ~ 255 sec/min  |          |          |          |                           |
| Environment              | Power On               | 5 V   | 3.3 V    | 12 V     | 5 Vsb    | -12 V                     |
|                          |                        | TBD   | TBD      | TBD      | TBD      | TBD                       |
| Physical Characteristics | Operating              | Operating   |          |          |          | Non-Operating             |
|                          | Temperature            | 0 ~ 60° C (32 ~ 140° F), depends on CPU speed and cooler solution   |          |          |          | -20 ~ 70° C (-4 ~ 158° F) |
| Physical Characteristics | Dimensions             | 170 mm x 170 mm (6.69" x 6.69")                                     |          |          |          |                           |
|                          |                        |   |          |          |          |                           |

Board Diagram

Ordering Information

| Part Number      | VGA | DVI | GbE LAN | COM |
|------------------|-----|-----|---------|-----|
| AIMB-280G2-00A1E | Yes | Yes | 2       | 2   |

Bracket View

Packing List

| Description      | Quantity |
|------------------|----------|
| AIMB-280         | x 1      |
| SATA HDD cable   | x 2      |
| SATA Power cable | x 2      |
| I/O port bracket | x 1      |
| Startup manual   | x 1      |
| Driver CD        | x 1      |

Accessories

| Part Number | Description                                     |
|-------------|---|
| 1700002204  | Dual port USB cable (27 cm) with bracket        |
| TBD         | LGA1156 CPU cooler for 2U and wallmount chassis |

# Value-Added Software Services

**Software API:** An interface that defines the ways by which an application program may request services from libraries and/or operating systems. Provides not only the underlying drivers required but also a rich set of user-friendly, intelligent and integrated interfaces, which speeds development, enhances security and offers add-on value for Advantech platforms. It plays the role of catalyst between developer and solution, and makes Advantech embedded platforms easier and simpler to adopt and operate with customer applications.

## Software APIs

### Control

**GPIO**

General Purpose Input/Output is a flexible parallel interface that allows a variety of custom connections. It allows users to monitor the level of signal input or set the output status to switch on/off a device. Our API also provides Programmable GPIO, which allows developers to dynamically set the GPIO input or output status.

**SMBus**

SMBus is the System Management Bus defined by Intel® Corporation in 1995. It is used in personal computers and servers for low-speed system management communications. The SMBus API allows a developer to interface a embedded system environment and transfer serial messages using the SMBus protocols, allowing multiple simultaneous device control.

**I2C**

I2C is a bi-directional two wire bus that was developed by Philips for use in their televisions in the 1980s. The I2C API allows a developer to interface with an embedded system environment and transfer serial messages using the I2C protocols, allowing multiple simultaneous device control.

### Display

**Brightness Control**

The Brightness Control API allows a developer to interface with an embedded device to easily control brightness.

**Backlight**

The Backlight API allows a developer to control the backlight (screen) on/off in an embedded device.

### Monitor

**Watchdog**

A watchdog timer (WDT) is a device that performs a specific operation after a certain period of time if something goes wrong and the system does not recover on its own. A watchdog timer can be programmed to perform a warm boot (restarting the system) after a certain number of seconds.

**Hardware Monitor**

The Hardware Monitor (HWM) API is a system health supervision API that inspects certain condition indexes, such as fan speed, temperature and voltage.

**Hardware Control**

The Hardware Control API allows developers to set the PWM (Pulse Width Modulation) value to adjust fan speed or other devices; it can also be used to adjust the LCD brightness.

### Power Saving

**CPU Speed**

Make use of Intel SpeedStep technology to reduce power consumption. The system will automatically adjust the CPU Speed depending on system loading.

**System Throttling**

Refers to a series of methods for reducing power consumption in computers by lowering the clock frequency. These APIs allow the user to lower the clock from 87.5% to 12.5%.

## Software Utilities

**BIOS Flash**

The BIOS Flash utility allows customers to update the flash ROM BIOS version, or use it to back up current BIOS by copying it from the flash chip to a file on customers' disk. The BIOS Flash utility also provides a command line version and API for fast implementation into customized applications.

**Embedded Security ID**

The embedded application is the most important property of a system integrator. It contains valuable intellectual property, design knowledge and innovation, but it is easily copied! The Embedded Security ID utility provides reliable security functions for customers to secure their application data within embedded BIOS.

**Monitoring**

The Monitoring utility allows the customer to monitor system health, including voltage, CPU and system temperature and fan speed. These items are important to a device; if critical errors happen and are not solved immediately, permanent damage may be caused.

**eSOS**

The eSOS is a small OS stored in BIOS ROM. It will boot up in case of a main OS crash. It will diagnose the hardware status, and then send an e-mail to a designated administrator. The eSOS also provides remote connection: Telnet server and FTP server, allowing the administrator to rescue the system.

**Flash Lock**

Flash Lock is a mechanism that binds the board and CF card (SQFlash) together. The user can "Lock" SQFlash via the Flash Lock function and "Unlock" it via BIOS while booting. A locked SQFlash cannot be read by any card reader or boot from other platforms without a BIOS with the "Unlock" feature.
